

## **Granite Gravel #56/57**

At PSK Landscape Supply, we are the premier supplier of premium bulk granite gravel to help you with all of your landscaping and construction needs. Our Marietta granite gravel is very versatile, meaning it can be used in almost any design project - from creating gravel driveways and walkways, to simply using it as a base for building asphalt paving, sidewalks, and railroad ballast.

Suppose you need a reliable and affordable material that can be used for a wide variety of purposes. Our granite gravel #56/57 stone is perfect for any outdoor landscaping or construction projects.

### **Description**

Pine Straw King Landscape Supply proudly offers the best Marietta granite gravel #56/57 stone in Georgia. This type of gravel is frequently used in an array of projects thanks to its incredible versatility. It can be used as a beautiful decorative ground cover, replacing dirt pathways in your yard, just as easily as it can be used as a base for construction projects.

This material also provides excellent drainage management as water easily percolates through the stones, removing excess moisture and preventing pooling or flooding. This is why many of our customers choose this type of stone for drainage projects, such as lining underground pipes, utility cables, and sewers. Our #56/57 granite gravel is one of the more abundant varieties available. You can always find it at a low price, making it both one of the most affordable and useful stones on the market.

Similar to other stones, there are a few situations in which #56/57 gravel may not be the best choice for the job. You should not use this material in a muddy location, as the stones can not support excessive water or mud and may sink or be displaced. Our #56/57 stone is also not recommended for use on sloped surfaces such as hills, as their shape and weight make them prone to sliding and washing away during heavy storms.

Now that you know all about our premium #56/57 gravel reach out today and place your order. We provide premium-yet-affordable Atlanta granite gravel in a variety of colors. Better yet, we can deliver it to your door and even install, if you'd prefer.

## **Crush N Run**

If you're searching for the best Marietta crush n run gravel available in the Peach State, then PSK Landscape Supply is here for you. We offer some of the most affordable Georgia crush n run gravel prices possible, as well as rapid delivery and professional installation. Our crush n run gravel consists of a mix of granite, #57 granite stone, and dust, making it a great option as an underlay for paving. This aggregate holds well and won't get muddy during rainy weather, thanks to the drainage it provides.

## **Description**

Are you looking for a reliable material that can be used for a variety of purposes, such as a base for patios or bedding for leveling slabs of rock and cement? Pine Straw King Landscape Supply has some of the best crush n run gravel available. It consists of stone, gravel, and dust that compact over time and is typically used in walkways or driveways, or as an underlay for paving. PSK Landscape Supply's high-quality crush n run is available by the scoop, all the way up to the dump truckload.

"How much is a dump truck load of crush n run?"

Well, a dump truck is eight cubic tons of material, so keep this in mind when placing your order. If you need help calculating the appropriate quantity of crush n run stone for your project, you can use our helpful material calculator. Keep in mind that one ton typically covers an area of approximately 100 square feet at 2 inches thick.

"Is there any company that provides rapid crush n run delivery near me?"

For those of you in Marietta, as well as the greater Atlanta area, you're in luck. We offer quick and reliable delivery directly to your door, as well as professional installation from our trusted experts available upon request.

If you're looking for a crush n run load, contact us today, and we'll deliver the highest-quality crush n run available right where you need it. Our friendly experts will help get you the amount you need, as well as help with installation if you want. At Pine Straw King Landscape Supply, we're always here to help.

## **Granite Sand**

Granite sand is the perfect hardscape material for your next landscaping project as it's natural, permeable, and, most importantly, affordable. Since it is so versatile and inexpensive, many choose granite sand to improve their garden's appeal. We offer the best Marietta granite sand in Georgia, at a low price, and with fast delivery. Contact us online or by phone, or even come visit our Marietta location to place an order today.

## **Description**

Granite sand is a fine dust made from decomposed granite rock, formed by the natural erosion of solid granite. Our Marietta granite sand has a soft, natural appearance, and is quite porous. While it may erode with time, it tends to remain firm underfoot and is easy to top off with fresh sand. Another benefit of using this material for your next project is that it provides good drainage, helps keep the dust down, and makes an excellent mulch material. Now that you know the main characteristics, you may be wondering what some common uses of granite sand are.

Granite sand is typically used in paving driveways, paths, and garden trails. You can also use it as a base for large trees because it breaks down easily, meaning that it won't be a problem if some migrates into your plant beds or lawn. Granite sand can also be the perfect material if you want to create an aesthetically pleasing visual transition between your garden and the wilderness, being an ideal leveling foundation.

However, you should avoid using this material too close to your house's entry, as it can easily stick to shoes and may scratch your floors. However, you can help mitigate this problem by placing a doormat in front of your entryway to help keep sand off your floors. If you're looking for a fine and coarse material to use as a paving base for your patio or walkways, Pine Straw King Landscape Supply has solutions. We offer the highest quality granite sand available, delivered directly to your door.

## **Slate Chips**

Do you need a versatile and durable ground covering that can be used pretty much anywhere in your yard? Slate chips may be the perfect choice for your next landscaping project. PSK Landscape Supply offers the best slate chips for landscaping at an affordable price, as well as professional installation by our team of landscaping experts if requested. Help give your driveway a unique texture and color by using our Marietta slate chips in your next construction project.

## **Description**

Slate chips are a versatile and inexpensive decorative landscaping material, with a variety of uses and properties. They are thin, long-lasting stone discs that won't deteriorate quickly or attract insects. They tend to range from 1 inch to 2 inches across, coming in shades of deep blue to dark grey. On top of this, these grey / black slate rock chips are easy to install and maintain, making them ideal for both residential and commercial installations.

They help retain soil moisture, offering a top layer to flower beds, planted areas, or atrioms and providing protection to your plants by reducing surface evaporation. These thin disks can be used for patios, driveways, walkways, and parking areas, as well as for garden paths or around trees. Their rich aesthetic helps give your yard a more natural and beautiful appearance.

Many landscaping enthusiasts and experts choose to use these decorative slate chips in their projects as they look great and are very reliable, producing gorgeous landscapes. Additionally, slate chips are very easy to maintain, only needing to occasionally remove leaves and dirt and gently rinse them with clean water. They are also easy to install anywhere in your yard. You simply need to clean and level the ground before placing the slate chips. You can also add a weed control treatment before placement to help prevent growth.

With Pine Straw King Landscape Supply, you can be sure you get the best deal on slate chips anywhere. We proudly offer the highest quality slate chips in Georgia, offering rapid delivery directly to your door. Our landscaping experts also offer professional installation if requested, and will gladly answer any questions you may have about the materials you're buying.

## **Rip Rap**

Have you been struggling with controlling erosion on stone wall bases? Rip rap stone is an ideal choice to help you form a protective barrier for your soil that prevents erosion over time. This type of material acts as support for unstable slopes and areas with large water flows. It's often used to help maintain bridges, streambanks, drains, and similar structures. PSK Landscape Supply offers affordable, high-quality Marietta rip rap for your next landscaping project.

### **Description**

Pine Straw King Landscape Supply is the most reliable rip rap supplier you will find in all of Georgia. Our rip rap rocks range in size from 2 to 24 inches and will easily help you build a protective barrier in unstable areas. Rip rap stones are very durable and have a natural look, all while keeping unwanted animals away thanks to the difficult terrain created.

Rip rap can be used along a shoreline to limit erosion or along the outer bank of river beds to reduce flow. It's also often used near bridges, embankments, and supports found in waterways. When building a large rip rap barrier, you have several factors to take into consideration. Using larger angular rocks with clean edges will make it easier to create an interlocking system, form a barrier, and use smaller, rounder rocks to fill it out.

Another important thing to keep in mind when building a rip rap barrier is to choose the right size and quantity of stone needed for your project. The size of the rocks you need depends on the steepness of the slope in a specific area, as well as water flow if you plan on using it along a

shoreline. After figuring out the area and size of stone needed, you can easily see how much rip rap you will need by using our material calculator.

At Pine Straw King Landscape Supply, we deliver rip rap straight to your house, right when you need it. We offer premium rip rap, as well as professional installation by our team of landscaping experts should you need it. So feel free to call and talk to our team today!

## River Gravel 5

River gravel, also known as egg rock #5, is excellent decorative material for dry creek beds, driveways, walkways, landscaped gardens, and for use as general ground cover. PSK proudly offers the greatest Marietta river gravel 5 available in Georgia. We also offer prompt delivery and are always available with rapid installation by our landscaping professionals if needed.

### Description

Do you need a material that can be used in a variety of ways offering your garden a unique look? Then our river gravel 5 may be the perfect material for you. They are 1 - 1-¼ inch stones that come in shades ranging from tan to white. These landscaping egg rocks can be used for garden paths, driveways, decorative ground cover, riverbeds, and many other applications.

River gravel is created via exposure to rushing water, making these stones very smooth, with their natural color revealed. Be aware that unwashed stones may have dust, sand, or other particles that will wash away with natural rainfall or after gently rinsing them. If you want to use river gravel to create a hard surface, you can set it in a concrete aggregate mix, which will help give your pavement a unique look.

River gravel can also be used for landscaping purposes in non-trafficked areas. Another excellent use for egg rock #5 is placing it around plants and shrubs, as the round surface of these stones allow rain and other water to soak through and permeate the roots. Since it enables the water to pass through, this material is also used in some drain construction.

When used as a bed for water gardens, ponds, and terrariums, this type of river gravel adds depth and beauty, as well as aiding in propagating beneficial bacteria. You can use our material calculator to figure out exactly how much egg rock #5 you will need for your next landscaping project. Once calculated, give Pine Straw King Landscape Supply a call, visit us online, or stop by our Marietta location and let us help you make your landscaping dreams a reality.

## River Gravel 4

River gravel 4, also known as egg rock #4, is a decorative material typically used in dry creek beds, aquariums, ponds, walkways, as well as a variety of other projects. These beautiful smaller stones will help give your garden a more unique and modern appearance. Pine Straw King Landscape Supply proudly provides the highest quality river gravel 4 at the lowest prices for all of your landscaping projects.

### Description

Our fine Marietta river gravel 4 is composed of small ¼-1 inch pieces of rounded stone of various colors. Shades such ranging from white to tan help give your projects a unique look. You can even use these landscaping stones in paving by setting them in a concrete aggregate mix. This will help your walkways and driveways have a unique look and overall aesthetic.

River gravel can be used for decoration purposes in areas of high visibility. These landscaping egg rocks are typically used for driveways, walkways, decorative ground cover, riverbeds, ponds, and many other areas. River gravel 4 can also be used around plants and shrubs because these small round stones let water easily soak through to the roots of any greenery you may have in your garden.

River gravel may be covered by dust, sand, or other impurities when first purchased, but will wash away after rain or rinsing. These stones also make a great choice as beds for water gardens, ponds, riverbeds, or terrariums, and even aid in beneficial bacteria growth.

If you want to add depth and vibrant colors to your garden or other landscaping projects, Pine Straw King Landscape Supply is your premier choice. As always, we offer prompt delivery, professional installation, and the highest quality stones available.

## Pea Gravel

If you need an inexpensive material that is great for covering driveways and paths, as well as filling spaces between stone pavers, then landscaping pea gravel is the stone for you. These small, thumbnail-sized rocks can be used as decorative ground cover for walkways, driveways, or other pathways, and offer a host of advantages as well. At PSK, we offer the most affordable and highest quality Marietta pea gravel throughout Georgia and provide prompt delivery and professional installation.

## **Description**

Pea gravel consists of small round pebbles with sizes ranging from 1/8 inch to 3/8 inches and come in shades of brown, gray, white, and even eye-catching colors like red or blue. These stones have round and smooth edges, making them soft to the touch. Walking on pea gravel is very comfortable thanks to its size and smooth finish, making pea gravel walkways an excellent choice for your home. Our pea stone has a wide variety of uses thanks to its versatility. From gardens or flower beds to dog runs, playgrounds to patios, pea gravel is suitable for just about all of your landscaping needs. Like any other small stone type, pea gravel can also be used for underground projects like pipe bedding and drainage.

An important thing to keep in mind when using pea gravel for your projects is that it needs to be edged properly. Small pebbles can easily change position and ruin your project, so you have to be careful when laying this type of stone. Moreover, if you plan on using pea gravel for flower beds in your garden, you need to note it will retain a lot of heat during warmer weather, which can be detrimental to your plants' wellbeing.

At the same time, pea gravel retains moisture, suppresses weed growth, and does not break down like mulch. It is not recommended for a garden with outdoor furniture, as it may not be stable and tends to shift often. Depending on the project, you should know how much pea gravel you need before purchasing. Thankfully, you can easily find out by using our material calculator. Once you know how much you need, contact Pine Straw King Landscape Supply to purchase the finest pea gravel available in Marietta.
