

Move Free. Think Free.

Maggie is a brand dedicated to creating smart products that enhance your productivity and comfort. Over the last decade, we have seen an evolution of innovation that has fundamentally changed the technology we spend most of our time using. With these modern tools, user's behavior has also changed.

We have become so obsessed with the information on our tablets that we often don't even notice the glaring lack of a comfortable and secure way to use them. Holding the tablet in one hand while navigating with the other not only affects your overall comfort level, but it can also lead to a sore back, neck, and even eye strain. We've all been there before.

Maggie is more than just a brand name. As a company, our philosophy is to bring comfort and stability to your life while using your tablet in bed or on the couch. Whether you are an entrepreneur, remote worker or student, our product provides you with a way to effectively increase the productivity and efficiency of your hectic work routine.

Maggie strives to create solution-based products that improve people's quality of life.

Our product allows you to enjoy hands-free operation while preventing your tablet from accidentally falling and slipping. You can securely attach your device to any pillow, with adjustability providing a wide range of possible positions while reducing unnecessary strain.

Adds Comfort

Maggie is carefully designed to ensure the highest level of comfort for users. This not only reduces hand and neck pain, but also helps prevent any repetitive strain injury.

Use Maggie Almost Anywhere

Designed with portability in mind. Maggie can be used on your lap, sitting on the couch, in bed, on the office desk, in the car, or wherever you need it.

Infinite Viewing Angles

The product allows you to adjust your tablet according to your position. With Maggie, you can easily change the viewing angle of your tablet according to your needs.

Works With All Tablets

Maggie works with all major tablet brands. You can use it for tablets of any size, regardless of the desired position.

Improves Accessibility

Whether you're typing, reading or watching something on your tablet, Maggie makes your tablet more convenient. Perfect eye angle and neck posture allow you to work for prolonged periods, maximizing comfort while enhancing output.

Enhance Productivity

Using a tablet device with an unbalanced body posture affects your comfort level, reducing how long you can use it. Maggie allows you to use your device for longer without any distractions, ultimately increasing your productivity.

Lightweight Design

Maggie is ultra-lightweight, which makes it more convenient to take with you and use anywhere. However, it's still strong enough to easily and securely carry the weight of any tablet.
