

NEXTSOURCE BIOTECHNOLOGY ANNOUNCES IMPROVEMENTS IN GLEOSTINE® ACCESSIBILITY AND AFFORDABILITY THROUGH PATIENT ASSISTANCE PROGRAM, NEXTSOURCE CARES®

Program emphasizes its capabilities to benefit even more uninsured patients needing NextSource medicine.

MIAMI, FL – October 01, 2017 – In response to the ongoing challenges patients face in paying their out-of-pocket costs for their prescription medicines, NextSource Biotechnology announced advancements in patient affordability and access initiatives for medically critical pharmaceuticals—particularly, its flagship chemotherapeutic product, Gleostine®.

Through NextSource Cares®, uninsured patients are provided hassle-free assistance to help them access Gleostine® (lomustine) capsules— a chemotherapy medicine used to treat primary or metastatic brain cancer or Hodgkin’s disease. In the last three years, NextSource has helped many uninsured patients get access to its prescriptions, providing them continued savings and benefits.

“During this time of healthcare uncertainty, many Americans face the possibility that they or a loved one may not be able to afford the medicines they sorely need due to being uninsured,” said Robert DiCrisci, Founder & CEO of Tri-Source Pharma—the parent company of NextSource Biotechnology. “We are thrilled to be among the companies that are helping to ease those fears by providing patients across America the access to medicines they need to live longer, healthier lives.”

“At NextSource, we work hard to understand the needs of patients, and we’re committed to making sure the medications they need are available and accessible,” said Richard Dinovitz, CCO, NextSource Biotechnology, and Executive Vice President, Tri-Source Pharma. “For years, our patient assistance program has been helping people get the medicines they need, at no cost. Our goal is to continue to improve our program for years to come.”

NextSource will continue to expand its efforts to increase awareness of the NextSource Cares® Patient Assistance Program. These efforts include community-based approaches, traditional and non-traditional advertisements, and through healthcare professionals and partners who share the goal of ensuring people have access to the medicines they need.

The NextSource Cares® Patient Assistance Program has a simple enrollment process and offers free delivery of medicines for enrolled patients to their home or doctor’s office for up to three cycles. Patients may be re-enrolled if they continue to need assistance. Patients, health care providers and patient advocates can visit www.NextSourceBio.com to learn more about the program, including eligibility criteria and how to apply, and to download the application.

About NextSource Biotechnology

Established in 2010, NextSource Biotechnology is a privately held pharmaceutical manufacturer. Its mission is to ensure the availability and consistent supply of pharmaceutical products that have experienced frequent market shortages. NextSource utilizes a network of leading Contract Manufacturers to successfully deliver these medically critical products, providing the treatments necessary to enhance the lives of patients suffering from unmet medical needs.
