

Give your face a lift – INSTANTLY

with Anew Clinical Eye Lift from Avon

Long days and late nights can take their toll and eyes are often the first feature to show signs of ageing. Fine lines, sagging and dark circles – many women wish they could turn back the clock on tired eyes.

Now you can forget painful, expensive surgery – there's a new way to stop time in its tracks. All eyes are on Anew Clinical Eye Lift, the dual eye treatment that delivers wide-awake eyes. No sags, no circles, just tighter, brighter eyes for a dramatically younger look.

This phenomenal two-part treatment is uniquely formulated to target the upper and under-eye areas. The Upper Eye Gel with Dimensional-Lift Technology strengthens from the inside out, boosting collagen and elastin production. The intensive Under Eye Cream's Derma-Refine Technology helps smooth and brighten skin.

ANEW CLINICAL EYE LIFT ABSORBS RAPIDLY – AND WORKS INSTANTLY

- The Upper Eye Gel delivers an on the spot lift
- The Under Eye Cream immediately reduces the appearance of under-eye shadows

AFTER 1 WEEK

- 91% of women saw a visibly firmer eye area
- 87% of women saw less puffiness

AFTER 4 WEEKS

- Upper eye contours are lifted, reducing sagging and drooping
- Puffiness, dark circles and crêpiness are visibly reduced

See the difference with Anew Clinical Eye Lift – cutting edge technology, without the cutting edge.
