

Alexa Fahel. A friend, daughter, beauty enthusiast and now a young entrepreneur. After many years of working in various jobs from the restaurant industry to marketing, it was time for me to break free and branch off towards my passion. Ever since I was young, I have always had a raging fervor for the beauty industry, learning new tricks of the trade and sharing this joy with others.

Not wanting to waste any time, I started working out of my own home, then renting a space out of a salon. I specialize in everything with eyelashes including extensions, lifts, and tints. This moved into lip blushing to add a natural semi-permanent tint, fix unsymmetrical lips, and cover any scars. Makeup and spray tanning have of course been one of the most artistic services to follow. After almost a decade of working at my parents' café, it was time to merge the two things I love into one. I am introducing Lashious Envy Beauty & Café Bar to the world.

When you book for our services, me and my team listen and give exactly what you requested. Whether that be eyelashes, nail services, facials, or teeth whitening. We are always open to offering our professional opinion, but we strive for customer satisfaction every time. Extended services will be available with my team of phenomenal women. So, the next time you stop in, prepare to be pampered with your favourite specialty espresso or sandwich from our Café Latte Cino bar and let me work my magic on you.
