

Washington National and Life Line Screening: *Partnering for your health and wellness*

At Washington National Insurance Company, our goal is to improve the health and wellness of our valued customers. That's why we've partnered with Life Line Screening—the leading provider of community-based preventative health screenings.

With Washington National, you have access to Life Line Screening's services.

- » Since 1993, Life Line Screening has conducted **8 million screenings**.
- » They host 16,000 screenings in communities across the U.S. annually, facilitated by **highly trained technicians**.
- » Medicare and traditional health insurance **don't typically cover** these types of screenings. Life Line Screening performs these screenings at an affordable cost.
- » The screenings are **convenient, accurate** and require little or no preparation.
- » Each health screening takes only about **10 minutes**.
- » Your screenings will be carefully reviewed by a Life Line Screening **board-certified physician**.
- » Once you receive your screening results, you can **develop a prevention plan** with your doctor.

Life Line Screening can help you identify your risk for major diseases, such as **heart disease, diabetes, cancer** and more.

Take preventative measures today for a **healthier tomorrow!**

By phone: **(800) 779-6145**

Priority code: **WNAA001**

Quick. Easy. Affordable.

Knowledge of your risk factors is the first step in developing a prevention and wellness plan. Life Line Screening services are convenient, accurate and require little or no preparation.

Here are just a few of Life Line Screening's health screening packages:

VASCULAR* \$135

This package uses ultrasound and EKG technology to assess your risk for cardiovascular disease.

ANNUAL KEY HEALTH \$79

This package uses finger-stick blood screening and other assessments to create a personalized report, which predicts your risk for stroke, diabetes, heart disease, congestive heart failure, chronic obstructive pulmonary disease and lung cancer.

BONE HEALTH \$99

This package uses ultrasound technology and blood screening to assess bone and thyroid health.

COLORECTAL CANCER \$55

This package offers health screenings to detect and assess risk for colon cancer.

VITAL ORGANS \$99

This package uses blood screening to assess liver function and risk for kidney disease.

WOMEN'S HEALTH \$139

This package uses blood screening to assess risk for thyroid disorder, diabetes, heart disease and stroke.

MEN'S HEALTH \$139

This package uses blood screening to assess risk for prostate cancer, diabetes, heart disease and stroke.

Life Line Screening is coming to your community to provide health screenings.
