Introducing Honda's

SUN RUN X

The world's first solar powered car!

The Sun Run X uses both solar energy and fossil fuels. The solar power function is automatic with no plugs or switch! It's low pollution, low mileage, and easy maintenance, starting at \$32,000.

The car has a 10-point safety check, was rated top safety by Kelley Blue Book, and has an automatic breaking system with side sensors.

It comes in three colors - metallic light silver, dark pewter, and metallic black.
