

# INNOVATIVE SIDEWALK SOLUTIONS

Work downtown with ease with Layher scaffolding and component parts that re-imagine projects with public commuters in mind. Pedestrian walkways and bike lanes stay open — and traffic flows freely — with Layher interlocking protect panels that keep areas free of work-site debris. Opaque panels keep unsightly construction obscured from the public view, while clear panels let light in for visibility. Signs attach easily to keep shops operating uninterrupted during project work and guide pedestrians through the city. With Layher, there's always a way forward that's easy and accessible.
