

VERTICAL TRANSPORTATION SAFETY

ENSURE THE SAFETY OF YOUR MOST OVERLOOKED DAILY COMMUTE

Our Vertical Transportation Industry (VTI) Safety services are built for companies involved in the installation, maintenance repair, and modernization of VTI equipment. SageSafety experts design custom modules that fit your specific operation, improving efficiency while keeping people safe. VTI safety services keep you in compliance and save you time and money.

Our **4-Part** Elevator Safety Program modules may be individually selected to meet company needs. In Part 1, **Safe Work Procedures**, you'll learn practical approaches to safety and efficiency. Discover knowledge and skills to avoid injuries in part 2, our **Training** segment. Implement a framework to ensure organizational success with our **Management System** module in part 3. And pin point where changes, retraining, or additional procedures are needed with the **Follow Up** portion in part 4.

ELEVATOR SAFETY

AN INVESTMENT WORTH MAKING

Entering, riding, and exiting an elevator are routine functions we often take for granted. With estimated trips of approximately 18 billion a year, elevator safety is a key part of your daily commute. Systemize your commitment to elevator safety by implementing a program that helps prevent incidents daily.

OUR 4-PART ELEVATOR SAFETY PROGRAM

- » Safe Work Procedures for Elevator Mechanics
- » Cross Department Training for All Organizational Roles
- » Management System Module to Ensure Operations Success
- » Follow-Up Process Segment to Measure Program Effectiveness

PROGRAM BENEFITS
