Hepatitis Care, Inspired by You

HEPATITIS

your team

Hepatitis Care, Inspired By You

Apothecary By Design works closely with patients and healthcare providers to help them make full use of hepatitis therapies, including new medications for hepatitis C, the most common chronic blood-borne infection in the United States.

In the past, treatments for hepatitis C had limited success and were often poorly tolerated. But today, medications are allowing people with hepatitis C to achieve outcomes that were impossible just a few years ago.

While these medications are generally well-tolerated and have a high potential for cure, unique reimbursement requirements and the need to follow a relatively brief but strict treatment regimen mean that patients need pharmacy support more than ever. ABD's multidisciplinary clinical team helps empower each individual with hepatitis C so he or she can experience the best possible result from treatment.

Our team of experienced pharmacists, nurses, and patient care coordinators bring decades of experience to hepatitis care.

compassionate + experienced

Why ABD?

Apothecary By Design's dedicated clinical team works closely with patients and their healthcare providers, providing consistent, practical support and guidance, and maintaining helpful communication throughout the course of therapy.

Our medication adherence program includes proactive, monthly calls to patients, assistance with side effect management, and engaging patients in problem-solving to overcome barriers. We clearly communicate the benefits of therapy and provide easy-to-follow instructions to make treatment as simple as possible. Working with healthcare providers, we also monitor lab results to make sure that treatment is on track. Here are some other reasons healthcare providers choose ABD for hepatitis care.

Real people and 24/7 support. When you or your patients call ABD during regular business hours, you'll speak directly to a member of your pharmacy team *in real time*. Our on-call pharmacists are also available at any hour to help with urgent needs.

Free, secure, overnight delivery. Medication will be shipped via next-day service (such as FedEx or UPS), at no charge. In the rare case of weather delays or other disruptions, we do whatever we can to meet your patients' needs. *That's why our on-time delivery rate exceeds 99.8%.*

Financial assistance. Our advocates can help your patients understand and optimize their benefits, utilize coupon and rebate programs, and secure financial assistance for out-of-pocket medication costs. *In 2015, we secured over \$4 million in financial assistance for our patients.*
