# Clearing the Path to Success

Apothecary By Design paves the way for your growth as a pharmacist, just as we clear the path to successful patient outcomes

# CLINICAL EXCELLENCE, REIMBURSEMENT SUPPORT, COMPASSIONATE CARE

## REIMAGINING PHARMACY CARE, INSPIRED BY YOU.

A new generation of medicines is helping patients with chronic conditions lead healthier lives. But many of these specialty drugs involve exorbitant patient costs, complex administration, and unique handling requirements.

That's why ABD does more than dispense drugs. Our experienced, dedicated staff of pharmacists, nurses, and patient care coordinators work to counsel, educate, and guide patients through their pharmacological care.

Here are some of the reasons healthcare programs and practitioners make ABD the specialty pharmacy of choice.

- **Network participation.** We are proud to be credentialed in the specialty pharmacy networks of leading health plans and pharmacy benefit managers, including Anthem, Catamaran, Express Scripts, and Prime Therapeutics.
- **Easy access and 24/7 support.** Our phones are answered "live" by knowledgeable staff during the day. On-call clinicians are accessible at any hour to help patients with questions or urgent care needs. Medications are shipped overnight, securely, confidentially, at no cost.
- **Extraordinary patient satisfaction.** 100% of the hundreds of patients responding to our 2015 quality survey were extremely satisfied or satisfied with our service.
- **Authorization success.** We have an 89% approval rate on prior-authorization requests/appeals for hepatitis C patients, and an even higher rate for patients with chronic inflammatory diseases.
- **Financial advocacy.** During 2015, we accessed \$4 million in funding to assist patients with the out-of-pocket costs of their medications.

- **Triple accreditation.** ABD is one of only a handful of pharmacies accredited by Accreditation Commission for Health Care, Pharmacy Compounding Accreditation Board, and URAC.
- **Broad licensure.** We hold pharmacy licenses throughout most of the United States.
- **Deep expertise.** ABD staff are experts in their fields, and include certified specialty pharmacists. We maintain strong academic affiliations with several schools of pharmacy. And our clinicians work in dedicated teams, each focused on the unique needs of patients in a single disease state.

## AT APOTHECARY BY DESIGN WE ARE PATIENT ADVOCATES.

Our mission is to improve the quality and affordability of healthcare for the people we serve through innovative pharmacy practice.
