	5 Ways to Manage Period Bloating (https://www.healthline.com/health/womens-health/period-bloating?utm_source=googleplus&utm_medium=social&utm_campaign=Social_SEO)			
		5 Ways to Manage Period Bloating		
	One of the more uncomfortable aspects of your menstrual cycle is probably bloating. Many women experience bloating during their periods, for example, feeling as if your abdomen is tight and swollen or that you have gained several pounds. In most cases bloating happens before you begin your period and disappears after several days. While you may not be able to completely prevent bloating, there are a few ways you can make it less severe. 	What Are the Benefits of an IUD? (http://www.emilysikkingobgyn.com/services/birth-control?utm_source=googleplus&utm_medium=social&utm_campaign=Social_SEO)			
	When you're trying to choose between the many different forms of birth control, one of your concerns is likely how effective it is, but there are other things to consider too. For instance, an IUD is a good choice of birth control for women who do not have severe menstrual bleeding during their periods. It is more than 99			
	Consider to. Per instance, an inch is a good colore of print control for worder who but never severe inclusional precing grant, and in some cases does not contain any hormones. In addition, an IUD can easily be inserted and does not have to be removed for between 3-12 years.			
	If you have questions about IUDs or birth control in general, you should talk to your provider so they can help you pick the right option for you.
