

# A Celebration Of Curves

Apr 2, 2009

STUNNING CURVED BATHS AND BASINS, FROM BATHROOM AND FURNITURE DESIGNER, WILLIAM GARVEY LTD

William Garvey, the acclaimed bathroom and furniture designer, celebrates the curve in 2009 with stunning circular teak baths and basins, guaranteed to make a splash in any home. The bathroom should be a sanctuary, the place you relax and soak away the stresses of the day. Surround yourself with curves rather than hard lines and angles and you will find your bathing experience enhanced beyond measure.

The Helio bath, surely one of the most stunning baths on the market, is a perfect circular structure with a circumference of 1700mm. Complex interlocking joints are fused together to give a smooth, curved finish with beautiful contrasts between the wood grain in the different layers. The circular bath allows you to really stretch out and indulge in a truly relaxing, spa-like experience and teak, with its natural warmth, will also keep your bath water warmer for longer.

An extraordinary piece of timber engineering, the Helio bath is guaranteed to make a statement in any bathroom. The Helio basin is complementary in shape and can either be used on its own or incorporated into a wash-stand, in which case it is called a Fusion basin. Both the Helio bath and basin are available as a standard range, however they can also be made to order which means you can have your bath or basin made to your exact specifications.

The rich colour and warmth of teak make it very appealing for use in the bathroom. Add to that the natural antiseptic qualities within the wood and its durability and it is easy to understand why teak bathroom products are enjoying increased popularity. Its suitability for use in wet situations is further enhanced by William Garvey Ltd's use of an innovative system called Timbertect Plus, which retains the look and feel of natural timber yet gives it the properties and ease of use normally associated with man-made materials. With more than 25 years of experience in making wooden baths and sinks, the company is happy to offer a no-quibble guarantee on all of its products against defects in materials or manufacture.

The design force behind Devon-based furniture-makers William Garvey Ltd is Bill Garvey, whose work is recognized for its simple, pared-down style that enhances the natural beauty of wood, resulting in a signature style that is effortlessly timeless. William Garvey has become a leading authority on successfully using wood in wet situations and the company has built up an extensive product range of baths, basins and sinks. In addition the company's wholly bespoke service has resulted in commissions for kitchen design and freestanding furniture. Large projects receive the same attention to detail as single pieces and the company has both the skill and the capacity to produce stunning work on a large scale. Increasingly William Garvey Ltd is commissioned to create bespoke control room installations including police, railway and power distribution projects.
