# Ubuntu Workshop

## Session One – Introduction and Installation

### Learning Objectives

By the end of this session, you will be able to

- Partition your hard drive to install Ubuntu laptop software
- Install Ubuntu on your laptop
- Ensure that your laptop is functioning properly with the new Ubuntu installation

### Session One Outline

1. Introductions: instructor, technical expert, and participants
2. Review and attain disclaimer forms regarding personal responsibility for laptops and changes
3. Review workshop objectives and brief outline of individual sessions [handout]
4. Review session one objectives [handout]
5. Partition hard drives [handout]
6. Install Ubuntu [handout]
7. Ensure all laptops are functioning properly [handout]
8. Review homework [handout]

### Session One Homework

Make a list of the applications that you use on your laptop. The instructor and technical expert will review this list to ensure that you can successfully incorporate these applications into your Ubuntu software.

# Ubuntu Workshop
