

# MIGRATE YOUR SAP HANA WORKLOADS TO RED HAT® ENTERPRISE LINUX®

The clock is ticking. By 2025, if you're running traditional SAP® applications, you must migrate to SAP HANA® which is only supported on Linux®. Red Hat® Enterprise Linux® is poised to help, enabling a consistent infrastructure for SAP applications and database workloads.

## BUSINESS VALUE OF SAP HANA

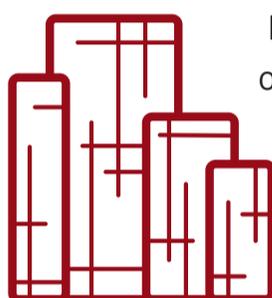

Five-year ROI of

# 575%

 **\$52.6 MILLION**  
higher revenue per organization<sup>1</sup>

# \$19.27 MILLION

average annual benefits per organization

“We’re continuing to see the benefit of Red Hat Enterprise Linux running on SAP HANA. We’re moving anything and everything to SAP HANA, and Red Hat is leading that digital journey.”

Vince Zuk, Director of Enterprise Infrastructure Architecture, Mohawk Industries

## RED HAT ENTERPRISE LINUX FOR SAP SOLUTIONS

### REDUCED COMPLEXITY

Move to a standard operating environment to experience immediate simplicity and streamline operations to improve speed to innovation.

### COMPLETE RED HAT PORTFOLIO

Run SAP HANA on Red Hat Enterprise Linux to maximize the complete Red Hat portfolio including solutions for containers, automation, and analytics—today and in the years to come.

### POWERFUL PLATFORM AT A LOWER COST

Gain 99.999% uptime, a ten-year support lifecycle, and continued 24x7 support, along with complete control, flexibility, and confidence at a lower cost than other Linux distributions.

## BUSINESS VALUE OF RED HAT ENTERPRISE LINUX

Three-year ROI of

# 348%

# 26%

**FASTER DEPLOYMENT**  
of new business applications<sup>2</sup>

# 68% LESS

unplanned downtime

# 45%

more efficient IT staff operations

“We felt Red Hat was the only operating system vendor offering support that could keep up with our HANA strategy.”

Vince Zuk, Director of Enterprise Infrastructure Architecture, Mohawk Industries
