Car Seat Safety Inspection by a Child Passenger Safety Technician

Heads up, Superparent: did you know that vehicle crashes are the #1 cause of death for children? According to various reports from the NHTSA (National Highway Traffic Safety Administration) 74-90% of car seats, booster seats and seat belts are misused. The best way to protect children in the car is to put them in the right seat at the right time—and use it the right way! During this private inspection, your technician will show you how to install your seat and ensure you are able to do it yourself. (A technician is not an installer; expect to climb in the car and wrangle the seat.) You will then talk next steps: which seat your child will need next and when; and how to tell when a seat is outgrown and/or needs to be converted from rear to forward facing.

Restrictions: Contact [REDACTED] at [REDACTED]@gmail.com to set up the appointment.
