

5 BEST VPNS FOR VIETNAM

Whether you are planning a visit to Vietnam, or you live there, you need a good and safe VPN to protect your online activity, and get access to certain sites such as Facebook, Twitter, Blogger, Instagram, WordPress, and other websites that has been restricted, because of Vietnamese government's unfriendly policies on internet use.

Vietnam ranks about 173 out of 180 countries that have restricted, censored, and monitored the internet for various reasons, and the government controls all online activities, communication channels including the media.

For this reason, any voice, idea, or suggestion that goes against the government or religion is considered a threat. Power has been given to the law enforcement agents in the country to detain, prosecute, and jail all offenders, just like it happened in 2016, whereby online activists and bloggers numbering about 35 were detained, and some of them jailed for more than 12 years.

The government has also banned political parties, human rights organizations, or websites that are against the government because the country is governed by the Communist party that sees the internet as a threat to their rule since it provides opportunities such as sharing of ideas and information to the people.

If you are involved in anything offensive, your IP address will be used to capture your identity, and you will be severely dealt with. For this reason, if you do not want to be a victim, or have limited access to the internet, then you should adopt a VPN for use in Vietnam, which will protect your personal data, details of your activities and location, but be sure to choose the best one.

Choosing a high-quality and the best VPN for Vietnam will give you many benefits such as

- ❖ Bypassing the internet restrictions
- ❖ Unlocking of sites
- ❖ Unlocking of resources from any location
- ❖ Hiding your IP address to allow access to restricted websites
- ❖ Providing secure and safe communication
- ❖ Fully encrypted internet.

Using the best VPN for internet protection will encrypt your internet connection to give you a new online identity through the VPN server you're using, so that, all your online activity cannot be traced back to you through your IP address, since the ISP server will not have the details of your activities on the websites you accessed.

Without a good VPN, your location, online communications, IP address, and browsing activity are at risk.

Summary of the Best VPNs

The best VPNs that can be used successfully in Vietnam include:

NordVPN: Using this VPN guarantees speed and security for all your online activities.

ExpressVPN: This VPN service offers fast, blazing-speed, extra security, with no restrictions.

CyberGhostVPN: If you need the highest possible speed with unlimited bandwidth and traffic, then this VPN service is the best for you.

IPvanishVPN: This is the world's best and fastest VPN service that allows you to connect up to 10 devices.

VyprVPN: Offers protected privacy at the fastest possible speed.

What to look for in a VPN for Vietnam

Using the Virtual Private Network (VPN) service for Vietnam, allows you to appear to be in a different country which enables you to have access to the sites restricted in that country.

A VPN for Vietnam must be able to bypass all websites restricted by the government, and you can avoid censorship by using this service. You can also suppress contents, internet blocks, and website services restricted in this country.

Bypassing the Vietnamese government restrictions with VPN could be dangerous, because of the government repressive nature.

You could be jailed if you are caught unblocking sites such as Popcorn Time and Put locker which has pirated contents.

Hundreds of VPN services offer badly implemented or outdated encryption with dodgy privacy policies that could expose you to the authorities. This is why it is important to use a good VPN service to avoid being exposed to the dangers of using a VPN in Vietnam.

So, what are the features of a good VPN for Vietnam?

A good VPN for Vietnam must secure your data with minimal connection logs or zero logs, and you must avoid using free VPN's in this country.

If you want to be completely secure, be sure to use a VPN that contains these features:

- ❖ Must maintain a good privacy policy by not keeping IP addresses or other personal data.
- ❖ Strong and secure VPN encryption that must meet the minimum protection standards.
- ❖ Must have a Kill Switch to ensure that no data is leaked, which could inform the Internet Service Provider of the sites you accessed, and this may result in a jail term if it is a censored website. For this reason, make sure that you activate a Kill Switch before using a Vietnam VPN.

- ❖ DNS leak protection – Your ISP could be informed of the restricted website you visited if there is a leakage in DNS. This is why it is not advisable to use a leaky VPN in Vietnam as they could get you into trouble.
- ❖ The VPN cloaking technology known as the Stealth Mode allows you to hide the use of your VPN so that the ISP cannot detect the sites you visited. This is why it is better to use a VPN with a Stealth Mode to hide it as HTTPs Traffic.

Our list of VPN for Vietnam has these features, and you can use them to access blocked social media sites which include Facebook, Twitter, and a messenger such as Yahoo Instant Messenger, which the government has censored its messages. You can also access, read, and write blogs such as Reddit, Yahoo360, and WordPress with these VPN's.

Here, we have carefully selected the best for use in Vietnam, and they provide the best online privacy using military-grade encryption.

The Best VPN for Vietnam

The 5 Best VPNs for Vietnam include:

1. NordVPN

NordVPN is a top VPN for use in Vietnam that uses double encryption to protect sensitive data and keep you private and secure always. This means that nobody can access your information because data sent and received online travels through an encrypted tunnel with a zero log policy.

The main features of this service that work together to make it the best for Vietnam include: DNS leak protection, double encryption, kill switch, and Stealth Mode. With these features, you can access the Internet without worrying about your security.

NordVPN offers about 4700+ servers located in more than 62 countries worldwide. With these number of servers, there will be no congestion with other users on the same server, and it offers unlimited speed and bandwidth with multiple connections of 6 devices simultaneously.

Vietnam users enjoy a fast connection because Southeast Asia houses some servers, and they are reliable with Customer Care friendly service, as well as a 30-day money-back guarantee.

Find out why [NordVPN](#) is the favorite among its users.

2. ExpressVPN

Using this VPN service to access the Internet ensures that your activity cannot be traced or tracked because it uses a highly encrypted 256-bit SSL secured connection. The ExpressVPN offers excellent features and fast internet speed with a guaranteed 99.9% uptime.

It also has a wide server network of more than 1700 servers located in 94+ countries across the world. Though it has a high subscription, their service is completely justified by excellent

customer service with a no-logs policy, high performance, and quality, with 30-days money-back guarantee.

Other features of this VPN include the following:

- ❖ Unlimited bandwidth, data, and server switch.
- ❖ 5 tunneling encryption protocols.
- ❖ Simultaneous connection of 3 devices.
- ❖ Free apps for popular devices.

Surf the Internet securely in Vietnam with a good VPN service provider such as Express VPN. Some of its servers are located in Asia and Southeast Asia to take care of its Vietnam users by offering them the best internet speed.

5. IPVanish VPN

Subscribers to this service may gain immensely because it provides access to geo-restricted channels and websites. IPVanish VPN gives you an opportunity to access the internet securely and safely and bypassing all censorships imposed by the government.

The Deep Packet Inspection (DPI) feature offered by this VPN service provider scrambles VPN packets, and turn them to non-encrypted, normal traffic. By so doing, it will be difficult for authorities to detect where your traffic is coming from.

It also has IPV6 leak protection, DNS leak protection, and a Kill Switch which offers zero logs policy. You can access more than 1000 VPN servers in over 60 countries with shared IPs of about 40,000+.

With the IPvanish, be rest assured of secured protection by the SHA-256-bit authentication, and the 256-bit AES encryption. It works well in Vietnam, and they control their network infrastructure fully, to prevent the VPN from being subjected to restrictions ordered by hosting providers or Internet Service Providers.

With its ultra-high-speed servers, multi-platform compatibility, and strong encryption protocols and other features, you are sure of no data leaks, with full online protection. Southern Asia is the home to some of its servers, and it offers Vietnam users, high internet speed and reliability.
